**Explore Big Data and AI with SoftwareOne AI Envisioning Kick-off:**
5,900.00 CHF all-in

AI Envision Workshop in a day

You are asking yourself how to use AI in your company to drive value? Which steps are necessary to become a data driven company? Then let's get started with the SoftwareOne AI Envisioning Kick-Off and explore together the chances of Big data and AI!

Together we will go through the different stages moderated and facilitated by experienced SoftwareOne consultants to get the same understanding of AI and align your stakeholders on common goals and visions. Part of this Kick-off will also be the identification of business areas where the biggest value is expected. And after choosing the most promising business areas use case generation will be started. As a result of this ideation phase meaningful rough ideas of prototypes will be created and metrics will be defined how to measure the value. Finally, there will be a short wrap up of which maturity is needed to work on your identified use cases and how SoftwareOne can support you getting ready.

One day workshop

Follow up
