Power a New Era of Intelligent Work with Gemini Enterprise

Experience the power of AI agents and explore how they can transform your business with intelligent, adaptable solutions. Gemini Enterprise provides Google-quality search and agents across all enterprise data and systems, with the highest level of compliance and data protections. It integrates Google's latest AI innovations like NotebookLM and Imagen, and offers a centralized hub for out-of-the-box, first-party, and third-party employee agents. Discover how to streamline workflows and boost productivity with AI-powered solutions.

About SoftwareOne's Gemini Enterprise Kickstart Implementation:

What's in

Non-Tech / Low-Tech enablement Sessions

To ensure ease of adoption, and embrace usage we'll run Enablement, Demo and AMA sessions.

Technical Workshops

WIF authentication access patterns, 1P and 3P Connectors, Actions, Agents, fine tuning - all in.

Data Value Discovery

Have a look on where and how data is stored and accessed, allowing to choose perfect match connectors.

It's a testing ground - so let's play

See what happens when you turn connectors on and of, delete credentials or take something offline.

What's out

Infrastructure as code / Terraform

Capability is there, final discovery engine API's aren't. We'll be able to support it, once TF does.

FinOps for GenAI

This offer is all about getting a feeling for Gemini Enterprise and embrace usage of the capabilities.

Managed Service

There's monitoring and analytics, in this setup we will not watch them proactively to fix stuff that breaks

Legal & Data Protection guidance

We're happy to highlight the certifications, testations, ToS and DPA references of the product.
