Gemini Enterprise

Power a New Era of Intelligent Work with Gemini Enterprise

Experience the power of AI agents and explore how they can transform your business with intelligent, adaptable solutions. Gemini Enterprise provides Google-quality search and agents across all enterprise data and systems, with the highest level of compliance and data protections. It integrates Google's latest AI innovations like NotebookLM and Imagen, and offers a centralized hub for out-of-the-box, first-party, and third-party employee agents. Discover how to streamline workflows and boost productivity with AI-powered solutions.

About SoftwareOne's Gemini Enterprise Kickstart Implementation:

What's in	What's out
Non-Tech / Low-Tech enablement Sessions To ensure ease of adoption, and embrace usage we'll run Enablement, Demo and AMA sessions.	**Infrastructure as code / Terraform** Capability is there, final discovery engine API's aren't. We'll be able to support it, once TF does.
Technical Workshops WIF authentication access patterns, 1P and 3P Connectors, Actions, Agents, fine tuning - all in.	**FinOps for GenAI** This offer is all about getting a feeling for Gemini Enterprise and embrace usage of the capabilities.
Data Value Discovery Have a look on where and how data is stored and accessed, allowing to choose perfect match connectors.	**Managed Service** There's monitoring and analytics, in this setup we will not watch them proactively to fix stuff that breaks
It's a testing ground - so let's play See what happens when you turn connectors on and of, delete credentials or take something offline.	**Legal & Data Protection guidance** We're happy to highlight the certifications, testations, ToS and DPA references of the product.
