

# ITAM Diagnostic

## Simplify and optimise your IT Asset Management (ITAM)

Are you achieving the required level of IT governance?

Managing your software assets and cloud spend can be time-consuming and extremely costly.

ITAM Diagnostic assesses the current level of maturity and governance, identifying areas of risk and gaps in strategy in your current ITAM practice, and provides a prioritised list of recommendations that help increase business productivity, efficiency, and cost optimisation, while reducing risk. Providing a real-time ITAM assessment to the organisation and top stakeholders can bring your business goals to reality faster.

With our ITAM Assessment, supported by our fully digitised platform, you will gain the insights you need to develop an effective IT asset management programme, for both on premise and cloud software and licensing.

### What is involved in our ITAM Diagnostic?

Choose the option that best suits your needs.

Our self-paced ITAM assessment can be done in less than 30 minutes, giving you a high-level overview of your ITAM maturity. As part of this assessment, you receive an initial set of recommendations that identify the most critical gaps so you can improve the overall performance of your ITAM programme.

Our comprehensive ITAM assessment provides an in-depth analysis of your current ITAM programme and identifies saving opportunities. If needed, evaluation of available ITAM tools may be a part of the service. You can compare your practice to peers in the industry, across different domains of the ITAM Diagnostic Framework including Strategy & Governance, Organisation, Functional Processes & Controls, Lifecycle Processes and Technology.

To investigate your ITAM programme implementation in more detail, one of our consultants would be happy to work with you to design a target operating model and build a strong business case to justify investments into your future ITAM programme. We will review how you are managing your compliance and consumption risks through policy, processes, skills and technology, making recommendations to improve any deficiencies we find, aligned to the ISO19770-1 standard.

### Empowering your operations to maximise the value of your software and cloud portfolio

Our ITAM Diagnostic reports benchmark how your organisation is performing against best practices, showing the effectiveness of your software and cloud portfolio.

- Get insights into your software estate with real-time dashboards
- Identify and mitigate gaps across different building blocks of your ITAM program including Strategy & Governance, Organisation, Functional Processes & Controls, Lifecycle Processes and Technology.
- Prioritise recommended optimisation initiatives based on the business risk and business value
- Gain intelligence that can be built into a business case for further investment in your ITAM practice

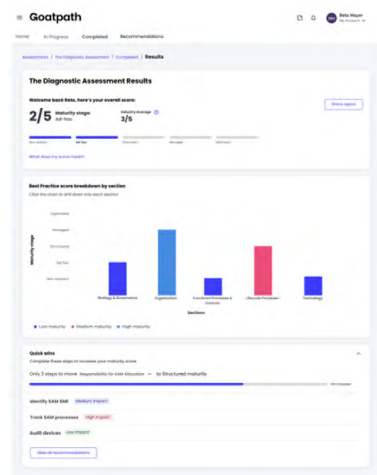

# What will you see in our ITAM Diagnostic?

## User friendly intuitive questionnaire

Our simple to complete self-serve questionnaire is a framework built on our extensive skills and experience.

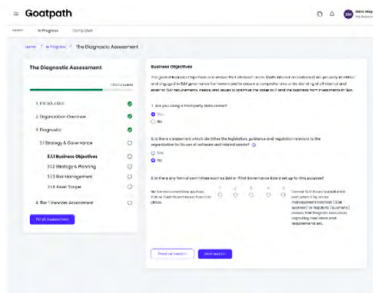

## Industry knowledge and benchmarking

Compare your company against your peers so you can make informed business decisions and improve best practices.

## Saves you time

Spend less time trying to manually collate information to assess your current situation. Our reports give you instant results.

## Intelligent recommendations

Receive a list of bespoke recommendations, saving you time and effort, and helping you to drive change within your business.

## Access to trusted advisors

Our expert team of advisors have completed thousands of projects and are on hand to provide you with guidance and advice whenever you need us.

## Benefits of ITAM Diagnostic Assessments

### Eliminating waste and reducing risk

Identify areas for cost optimisation and compliance risk

### Proactive audit defence

Holistic diagnostics of the software estate bring a new level of audit protection to the organisation

### Speed

Real-time dashboards keep the IT and C-Level apprised of areas that need to be addressed in the near and long-term

### Real-time

Current state review of software assets - no longer reactively addressing issues

### Elevating ITAM to C-Level

A comprehensive diagnostic tool the C-Suite can leverage
